Reviews

This ebook is worth acquiring. Better then never, though i am quite late in start reading this one. You will not truly feel monotony at at any time of your own time (that's what catalogues are for about if you ask me).

(Lorenz Vandervort)

RADIUM VOLUME 3

DOWNLOAD

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1914 Excerpt: . . . number present at the time t , and X , a constant characteristic of the species of atoms, and known as the radioactive constant, q . v. When equilibrium is attained, the number of atoms of each product decaying is compensated by the number produced, the amounts of each product being inversely proportioned to its radioactive constant Unlike the constant of monomolecular chemical changes, its value is independent of the temperature, chemical constitution, and any other factors that influence the speed of chemical changes. Uranium. The first member of the uranium-radium series, q . v. Its principal sources are pitchblend and carnotite. A member of the iron group. For its estimation and separation see Brearley, The Analytical Chemistry of Uranium. Uranium x. The product responsible for the photographic action of uranium compounds, and first separated from uranium by chemical methods by Crookes. See U-Ra series. Uraninite. Pitchblend. Varnish Applicators. For applying radium and mesothorium to superficial growths or over extensive growths, the radioactive substance in the form of a sulfate salt is embedded in a hard resistant varnish on a suitable metal plate. Varnish applicators are usually square or circular in shape and the amount of radium (element) per square centimeter determines their strength. In accordance with the practice of the London Radium Institute, a full strength applicator contains 5.36 milligrams of radium element per sq. cm. of area. Half strength and quarter strength applicators contain respectively 2.68 and 1.34 milligrams of radium element per sq. cm....
