Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Junior Chemistry This book is based upon an experience of teaching young pupils which has extended over many years. It is an attempt to present a thoroughly sound course of experimental chemistry on modern lines, and though it was originally designed to fit the syllabus of the Junior Examination of the Central Welsh Board, it has been expanded, at the publisher's request, so as to cover the ground needed for all kindred examinations of a similar standard. The course is divided into four parts, each of which forms a complete and separate unit. It is based throughout upon laboratory work, and while the text itself provides full material for class instruction, the author has added a large number of exercises at the end of each part, from which extra work may be taken at the discretion of the teacher. This material consists of (1) a set of questions for discussion; (2) a series of test-papers dealing with both theoretical and practical work, consisting largely of questions actually set in the various public examinations. Short historical sections are included in smaller type, with the object of stimulating interest, and an attempt has been made to render free discussion and revision a habit. Queries are inserted broadcast, and cross-references to earlier work are plentiful. The apparatus described is of the simplest possible type consistent with accuracy. This seems better adapted to young pupils, and it possesses the additional merit of being more easily reproduced from memory. All the diagrams (with the exception of Fig.55) have been specially prepared for this book, and simplicity of design has been the first consideration. About the Publisher Forgotten Books...
