Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from First Year Science First Year Science deals with the earth and the sun in their relations to man. This treatment has three advantages: it gives the book unity; it gives practical interest; and it offers all the earth science needed to meet such requirements as those of the College Entrance Examination Board. The book is meant for immature students. For this reason the language is simple, not technical, and the principles are thoroughly illustrated by experiments and pictures. A treatment too terse and condensed tends to confuse young students; hence the topics in First Year Science are sufficiently discussed to enable young pupils to master them with ease. All subjects of elementary school science - physics, chemistry, meteorology, botany, zoology, physiology, astronomy, physiography, forestry, and agriculture - are treated, so that the pupil can find out for himself which ones he wishes to study later in the course. The book is complete in itself; no reference library, no manual, is needed. The experiments require only the simplest apparatus. In most cases the mere reading of them is sufficient to illustrate the text. The separate chapters, while forming links in the development of the whole subject, are in most cases separate units, any one of which may be omitted when time for it is lacking. Each chapter closes with a pithy summary and suggestive questions. The book deals with the large and concrete things which surround boys and girls and in which they are naturally interested. There is little abstract theory, the effort being to call attention to things that can be seen and appreciated. About the Publisher Forgotten Books publishes hundreds of thousands of rare...
