

The major global trends in population, food, greenhouse, and oil

By Stefan Krauss

GRIN Verlag Jul 2014, 2014. Taschenbuch. Book Condition: Neu. 297x210x1 mm. This item is printed on demand - Print on Demand Neuware - Essay from the year 2004 in the subject Environmental Sciences, grade: HD, Murdoch University (ISTP - Institute for Sustainability and Technology Policy), course: Global Environmental Issues, 33 entries in the bibliography, language: English, comment: This essay examines the following questions: What are the major global trends in population, food, greenhouse, and oil that need reversing Some suggestions of some signs of possible hopeful change concerning greenhouse effect and climate change. The main barriers to change concerning greenhouse effect and climate change. , abstract: In order to answer questions, it is always advisable to step back and reflect upon what the speech-parts used mean. The question contains the four title-like terms 'population', 'food', 'greenhouse', and 'oil' referring to global issues that are heavily and controversially discussed by the political and academic community. It is to be emphasised that these issues are highly intertwined and pose various environmental, economical, social, political, and cultural challenges. The question supposes that there are 'major trends' in these issues. Moreover, the usage of the definite article seduces one to assume that there is...
